OBJECTIVE

Dedicated and quick learner with strong problem-solving abilities, analytical thinking, and a positive attitude. Able to work effectively both independently and in team environments, with a strong motivation to learn, grow, and contribute meaningfully to organizational goals.

SKILLS

Technical Skills: Linux , Shell Scripting , Python , Git and Github , GitLab , AWS Cloud , Docker , Kubernetes , Terraform , Jenkins CI/CD Pipeline , SQL

EDUCATION

Shri G.S Institute of Technology and Science Master of Computer Application (MCA) (CGPA : 7.58)	Indore(MP) 2024 – 2026
Medi-Caps University Bachelor of Computer Application (BCA) (CPGA : 8.96)	Indore(MP) 2021 – 2024
Alpine Public School Higher Secondary Education (12th) (Percentage : 77%)	Indore(MP) 2020 – 2021
Alpine Academy Secondary Education(10th) (Percentage : 79.4%)	Indore(MP) 2018 – 2019

EXPERIENCE

Full Stack Developer Intern at CODEC TECHNOLOGIES (Remote)

- Architected cloud infrastructure to deploy a MERN-based food delivery platform supporting customers, vendors, and delivery partners.
- Configured IAM, VPC networking, EC2 instances, Application Load Balancer, Auto Scaling Groups, and Route 53 for secure traffic routing and high availability.
- Implemented CloudWatch monitoring with SNS notifications and EventBridge rules to automate infrastructure monitoring and operational alerts.
- Delivered a cloud-native deployment architecture supporting high availability, scalability, and operational monitoring.

PROJECTS

Enterprise Container Delivery Platform | Jenkins, Docker, Kubernetes, Helm, SonarQube, GitHub

- Designed and implemented an end-to-end CI/CD pipeline to automate application build, code quality analysis, containerization, and deployment to Kubernetes.
- Integrated Jenkins with GitHub webhooks and SonarQube to automate code validation, quality gates, and continuous delivery workflows.
- Containerized applications using Docker, managed image versions through a container registry, and deployed workloads using Helm charts on Kubernetes.
- Implemented Kubernetes Deployments, Services, Ingress, ConfigMaps, Secrets, and Horizontal Pod Autoscaler to enable scalable, zero-downtime application deployments.

Kubernetes Observability & Self-Healing Platform | AWS EKS, Terraform, Prometheus, Grafana, GitLab

- Provisioned a production-ready Amazon EKS cluster using Terraform with modular Infrastructure as Code for repeatable and automated cloud deployments.
- Configured Kubernetes workloads with namespaces, resource limits, ConfigMaps, Secrets, and Horizontal Pod Autoscaler to improve application reliability and resource utilization.
- Implemented Prometheus and Grafana to collect cluster metrics, visualize infrastructure health, and monitor node, pod, and application performance through real-time dashboards.
- Demonstrated Kubernetes self-healing capabilities by validating automatic pod recovery, health checks, autoscaling, and operational troubleshooting under simulated failure scenarios.

CERTIFICATIONS

- Web Designing and Development organised by Indore Institute of Science and Technology Industrial Training on Embedded System and Robotics at Platforuma
- Robotics Workshop for Volunteering in the workshop at SVKM's NMIMS , Indore

ACHIEVEMENTS

- I have 3 Star rating in Java on HackerRank .
- I was among the top 10 in Web Designing and Development Training Program organized by Indore Institute of Science and Technology (IIST) and get 2500 cash prize money - (Aug 2022).
- Achieving 4th rank in my Bachelor degree B.C.A. (2021-2024) with a CGPA of 8.96.

ROLE OF RESPONSIBILITY

- Executive member of technical Club - Student Technical and Innovation Club (STIC) and MUACM .
- Volunteered as a representative from PLATFORUMA at School of Technology Management and Engineering NMIMS Indore for a Robotics Workshop .
